Availability for Internship: 20 July 2026 – 09 October 2026

Professional Summary

I am a motivated Information Technology diploma student at Asia Pacific University in Kuala Lumpur, with hands-on experience in both customer service and programming. Having worked as a barista at ZUS Coffee and service crew at Da Truth, I have developed strong teamwork, communication, and problem-solving skills. I am also passionate about tech, with experience in Python (3 years), Java, HTML, CSS, PHP, JavaScript, and MySQL. My academic foundation and self-driven learning through certifications like Programming for Everybody (Python) and Excel Crash Course reflect a balance of technical and interpersonal abilities. Fluent in Chinese, conversant in English, and learning Malay, I am adaptable and eager to apply both his technical knowledge and customer service background to real-world IT or tech-support roles.

Working Experience

- **Service Crew:** Da Truth – Overseas Union Garden (March 2025 – April 2026)
 - **Barista:** Zus Coffee – Melaka (March 2024 – June 2024)
-

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, PHP, HTML, CSS, PostgreSQL, MySQL, React
 - **Tools & Platforms:** Git, GitHub, Vercel, Microsoft Excel
 - **Frameworks & Libraries:** MySQL, Flutter
-

Languages

- English (Fluent)
 - Malay (Fluent)
 - Mandarin (Intermediate)
-

Education

Diploma in Information Technology – Asia Pacific University (APU), Kuala Lumpur

August 2024 – Present

- Relevant Coursework: System Analysis & Design, Database Concepts, Web Development, Programming with Python, Java Programming.

Sijil Pelajaran Malaysia (SPM) – SMK Tinggi St. David, Melaka

January 2019 – March 2024

Certifications

- **Programming for Everybody (Getting Started with Python)** – Coursera/University of Michigan, *November 2022*
 - **Excel Crash Course - Spreadsheet Formulas for Finance** – Corporate Finance Institute, *December 2021*
 - **First Step Korean** – Coursera/Yonsei University, *May 2022*
-

Projects

Underrated (DJ Studio Booking Platform) –

<https://github.com/dylanc0214/studio-booking-system>

- Developed a full-stack web application for DJ studio session bookings using React 19, TypeScript, Node.js, and MySQL with Prisma ORM.
- Implemented secure user authentication (JWT & Google OAuth) and integrated payment processing with receipt uploads.
- Built a comprehensive admin dashboard to manage bookings, user accounts, and block studio availability dates.

DuitFlow (Personal Finance Application) –

<https://github.com/dylanc0214/duitflow>

- Engineered a modern personal finance tracker using Next.js 15, TypeScript, and Tailwind CSS to monitor incomes, expenses, and budgets.
- Integrated Supabase for secure Google OAuth authentication and scalable PostgreSQL database management.
- Deployed the application on a VPS utilizing PM2 and an Nginx reverse proxy for continuous availability and secure HTTPS routing.

EcoQuest (Web Application Development Project) –

https://github.com/lw112k/Group7_EcoQuest

- Collaborated with a team of students to build a web-based sustainability platform using the WAMP stack (Windows, Apache, MySQL, PHP) to gamify eco-friendly activities.
- Developed key features including a Green Points reward system and a community forum, implementing Role-Based Access Control (RBAC) for secure user management.
- Engineered dynamic functionalities such as badge unlocking and real-time post interactions (liking/reporting) using AJAX and PHP.

Advanced Tuition Center (Java Programming Assignment) –

https://github.com/lw112k/Group16_JavaAssignment

- Designed and developed a console-based application using Java, applying strict Object-Oriented Programming (OOP) principles like inheritance and polymorphism.
- Implemented core features including user authentication, data validation, and file handling to ensure data persistence and system stability.
- Conducted rigorous testing and debugging to resolve logic errors, ensuring a 100% error-free execution during the final presentation.

FlowForge (Workflow Management Platform) –

<https://github.com/dylanc0214/flow-forge>

- Created an internal company workflow platform utilizing React, Node.js, Express.js, and MySQL to streamline business processes and request tracking.
- Designed multi-step approval workflows with strict Role-Based Access Control (RBAC) for employees, managers, and admins.
- Containerized the multi-tier application architecture using Docker and Docker Compose for efficient and consistent deployment.
