I am a motivated Information Technology diploma student at Asia Pacific University in Kuala Lumpur, with hands-on experience in both customer service and programming. Having worked as a barista at ZUS Coffee and service crew at Da Truth, I have developed strong teamwork, communication, and problem-solving skills.

I am also passionate about tech, with experience in Python (3 years), Java, HTML, CSS, PHP, JavaScript, and MySQL. My academic foundation and self-driven learning through certifications like Programming for Everybody (Python) and Excel Crash Course reflect a balance of technical and interpersonal abilities.

Fluent in Chinese, conversant in English, and learning Malay, I am adaptable and eager to apply both his technical knowledge and customer service background to real-world IT or tech-support roles.

Personal Details
